Increased Safety & as strong as steel

Polyester (PET) and Polypropylene (PP) Strapping

Polyester (PET) and polypropylene (PP or Poly) strapping are safer, easier and more economical alternatives to steel strapping. PET is 80% lighter than steel and offers excellent load retention for medium- to heavy-weight applications, including lumber and bricks. PET has more flexibility than steel and less elongation than Poly. Poly (PP) strapping is half the weight of steel and is highly economical for light- to medium-weight loads and general-duty applications.

Product Features

- Poly strap retains tension and keeps goods secure during transport
- Lightweight and easy to use
- No sharp edges
- Suitable for semi- and fully automatic strapping heads

**HAND
GRADE**

PET & PP STRAPPING

Hand grade strapping in black embossed PP or smooth green PET. 16x6 core. PP 350 – 900 lb. break; PET 820 – 1100 lb. break.

**POWER TOOL
GRADE**

PET STRAPPING

Green power tool grade PET strapping. 16x6 core. Smooth or embossed finish. Available in 800, 1400 and 1900 lb. break.

**MACHINE
GRADE**

PP STRAPPING

White machine grade strapping. 8x8 core. Embossed finish. Available in 300 or 350 lb. break.
